To Whom it May Concern:

Developing and restoring Mack Laing's residence, Baybrook House, as a Nature House for educational uses supports the uniqueness of the site, the natural and human history.

The Nature House would be an asset to our programs and a place for our pre-school children and families to learn and experience Nature. It is also a site that is important in First Nations culture. Baybrook is located by Brooklyn Creek overlooking Comox Bay and Baynes Sound. This area has a rich archaeological history supported by nature's abundance.

Yours truly,

Annette Bentley,
Executive Director

On behalf of Upper Island Women of Native Ancestry Society
