The Town of Comox
1809 Beaufort Ave.
B.C. V9N 4B8

Dear Sirs;

This Society feels that a museum of natural history would be a great benefit to the Comox Valley. Numerous calls are received by our members by people seeking information regarding our local birds, flowers, shorelife, etc. These calls come not only from residents but from many visitors to the district.

As a consequence we wondered if consideration could be given to establishing such a museum in the home of H. Mack Laing when it becomes available.

The Provincial Museum in Victoria is the only such facility on Vancouver Island, apart from some ^{Nature} centres. We believe that another museum, situated here, would greatly enhance the prestige of the district and prove to be a tremendous tourist attraction.

Should this suggestion interest you we would be pleased to serve on a steering committee to study the feasibility of financing same.

Yours Sincerely,

Diana Maloff
