To: Town of Comox officials,

I have spent my life since the 1960s battling to hold back the destruction of our human and natural heritage - in fact my first one man show in 1967 was based on that very topic. It is your job to protect this property and honour the wishes of its owner, which will eventually serve all of the citizens of Comox well, and down on through their children and grandchildren. Development and condos – not so much.
